

STAR BARRIERS

MaxiForce Star Barriers are a flexible, easy to set-up, and cost-effective barrier solution that allows you to control traffic flow requirements at mobile or temporary checkpoints.

FEATURES

- ✓ Fast and easy set-up
- ✓ Lightweight design
- ✓ High visibility
- ✓ Unlocks and removes quickly and easily
- ✓ Easy to store and transport
- ✓ Doesn't require special training for setting up
- ✓ Comes in a compact, portable and durable case

Star barriers are a great barrier alternative to complicated concertina wire, jersey barriers or traffic cones, due to their lightweight design and compact storage for fast checkpoint setup.

Each star is equipped with three steel spikes and is attached to other stars, using cabling. Multiple stars form an effective blockade at varying lengths which can cause considerable damage to any vehicle trying to pass the secured checkpoint.

Find out more about MaxiForce Star Barriers:

MaxiForce Star Barriers offer fast and easy set-up. Each star barrier is a 2 piece unit that is secured with a padlock. The star units can be used individually, or the padlocks can be used to connect the units with the provided cables to form a 2 or 3 star barrier.

TYPICAL APPLICATIONS

- Mobile checkpoints
- Crowd protection
- Events traffic control
- Temporary work zone areas
- Temporary utility protection
- Temporary barrier for crime scenes
- Parking areas, and more...

SIZES

Weight: 12.2 lbs (per star)
